## EDUCATION

---

### Basaveshwar Engineering College

*Bachelor of Engineering in: Computer Science and Engineering (CSE),*

Bagalkot, KA

*Aug. 2016 – Sept 2020*

### Dr. C B Gurukul

*Pre-University College (PUC)*

Bhalki, KA

*Aug. 2014 – May 2016*

## EXPERIENCE

---

### Software Developer

*Techno Touch Business Solutions*

August 2022 – Present

*Bengaluru, KA*

- Created custom components, forms with client-side validations, and interfaces for user interactions in React.
- Integrated third-party libraries into existing React applications such as React Bootstrap, Crypto-js for encryption, or encoding, and Router, etc.
- Monitored browser compatibility issues while coding layouts using HTML5, CSS3, and JavaScript along with other frameworks like Bootstrap, Ant Design, etc when creating React apps.
- Contributed ideas and feedback during sprint planning meetings to help prioritize tasks related to developing a react application.
- Delivered code to meet functional or technical specifications.
- Worked on react-spreadsheet and added features like adding rows and columns, deleting rows and columns ,formula based calculations in the spreadsheet cell, handling the data in to spreadsheet from API's

## PROJECTS

---

### AI-driven movie recommendation app | *React, Redux, Firebase,Tailwind CSS, Gemini API Key*

- Developed a React based application integrating Gemini for AI-based movie recommendations.
- Utilized TMDB APIs to fetch comprehensive movie data, enhancing recommendation accuracy.
- Integrated Firebase for user authentication, ensuring secure and enabling protected routes for sign-in and sign-up functionality.
- Incorporated Tailwind CSS to ensure responsiveness, resulting in an improved user experience across various devices and screen sizes.
- Utilized reusable components, custom hooks to follow standard code practices and leveraging state management with React Toolkit for efficient data handling
- Embedded with youtube with autoplay feature in the background of the main container
- Source code : [Click here](#)

### Video Streaming App -Youtube Clone | *React, Redux, React Router,Tailwind CSS, Youtube APIs*

- This is a clone of the popular video-sharing platform YouTube, developed as a part of Akshay Saini's Namaste React course. It is built using modern front-end technologies, including React, Redux Toolkit, TailwindCSS, and other libraries.
